To make picture gift tags:

1. Print on cardstock or heavy bond paper and fold on the middle line. To aid in folding with a sharp crease, use a ruler and a pizza cutter to make the initial fold line. It makes it quite easy to fold with a clean, crisp crease.

2. Cut out the picture area and glue or tape picture on back so it shows through opening.

3. Place 2 sided tape between halves to hold them together tightly.

4. Re-fold tag in half and punch a small hole at the center near the top where the 2 edges meet.

5. Draw a ribbon through hole and knot for hanging.

5. Completed Tag Front & Back
